

Full Conference Program

Monday, June 22, 2026

3:00–8:00 p.m. **Registration**

6:00–9:00 p.m. **Welcome Reception**

Tuesday, June 23, 2026

08:00 a.m. **Opening Ceremony**

Session 1: Zeolite membrane preparation and characterization I

8:30 a.m. **INVITED TALK: Zeolite Membranes from Commercial Dehydration to Emerging Gas Separations**
Saki Moriya (Mitsubishi Chemical Corporation)

9:10 a.m. **Improved Synthesis of Hollow Fiber SSZ-13 Zeolite Membranes for High-Pressure CO₂/CH₄ Separation**
Xingyu Peng (Nanjing Tech University)

9:30 a.m. **Laminar CHA Zeolite Composite Membranes Integrating UV-Perforated Graphene Oxide for Enhanced Molecular Transport**
Xiangcheng Dai (Zhejiang University)

9:50 a.m. Coffee break

Session 2: Preparation and characterization of MOF and other membranes

10:20 a.m. **INVITED TALK: tba**
Mohammed Eddaoudi (King Abdullah University of Science and Technology)

11:00 a.m. **Synthesis of Fully Conjugated 3D Covalent Organic Framework-based Thin Films**
Shitao Wang (Beijing University of Chemical Technology)

11:20 a.m. **Two-dimensional MXene membranes with controlled nanochannels for precise molecular sieving**
Li Ding (Tsinghua University)

11:40 a.m. **Light-Responsive Membranes for Low-Energy Molecular Separation**
Martin Presselt (Leibniz Institute of Photonic Technologies Jena)

12:00 p.m.	Lunch
1:00 p.m.	KEYNOTE: Towards the Ultimate Membrane: Scalable, Green, and Rapid Synthesis of High-Performance MOF Films Kumar Varoon Agrawal (École Polytechnique Fédérale de Lausanne)
1:30 p.m.	Heterogenous growth: A new approach for synthesis of zeolite membranes with high performance Jianhua Yang (Dalian University of Technology)
1:50 p.m.	Tunable polymer functionalization of covalent-organic framework nanosheet membranes for precise molecular separation Jing Zhao (Nanjing Tech University)
2:10 p.m.	Double self-assembly layer-by-layer fabrication of ultrathin graphene membranes on porous ceramics for the separation tasks in extreme alkaline conditions Guobin Jia (Leibniz Institute of Photonic Technology Jena)
2:30 p.m.	Coffee break
Session 1: Zeolite membrane preparation and characterization II	
3:10 p.m.	KEYNOTE: Zeolite Membrane Preparation for Molecular Sieving Jungkyu Choi (Korea University)
3:40 p.m.	Fabrication of asymmetric MFI zeolite membrane layers via conversion of wet gel layers Zhengbao Wang (Zhejiang University)
4:00 p.m.	Synthesis of Sigma-1 zeolite membrane on hollow fiber for selective water separation from simulated CO₂ hydrogenation mixture Peng Du (Nanjing Tech University)
4:20 p.m.	Fabrication of Metal-Doping Zeolite Membranes for CO₂ Separation Li Peng (Nanjing Tech University)
4:40 p.m.	Heterogeneous synthesis of MFI-type zeolite membranes toward superior CO₂/N₂ separation performance Jun Li (Zhejiang University)
5:00 p.m.	Hollow fiber supported MFI zeolite membranes for hydrocarbons separation Yuting Zhang (Nanjing Tech University)
5:20 p.m.	Molecular Bridges Enabled Oriented MFI Zeolite Membranes Xiaoqin Zou (Northeast Normal University)
5:40 p.m.	Poster Session
8:00 p.m.	End of Day 1

Wednesday, June 24, 2026

08:20 a.m. Daily announcements

Session 3: Preparation and application of MOF and other membranes I

8:30 a.m. **INVITED TALK: Covalent Organic Framework Membranes for Molecular Separations**
Dan Zhao (National University of Singapore)

9:10 a.m. **Elegant customization of MOF molecular sieve membranes for high-performance separations**
Yuan Peng (Dalian Institute of Chemical Physics)

9:30 a.m. **Metal organic framework hybrid membranes towards practical hydrocarbon separations**
Guangwei He (Tianjin University)

9:50 a.m. Coffee break

Session 4: Novel materials, methods and applications

10:20 a.m. **INVITED TALK: Crystal Growth as a Design Lever: Engineering Anisotropy in Porous Framework Composites**
Jia Min Chin (Universität Wien)

11:00 a.m. **Zeolite nanosheet-based ion exchange membranes: from brine desalination to proton and anion conduction in electrochemical cells**
Junhang Dong (University of Cincinnati)

11:20 a.m. **Towards 2D Free-Standing Polymer Membranes for Compartmentalization from Laterally Linked Langmuir Monolayers**
Sarah Jasmin Finkelmeyer (Leibniz Institute of Photonic Technologies Jena)

11:40 a.m. **From UiO-66 Gel Membranes to Electrospun UiO-66@PCL Composites: Structure-Performance Control for PFAS Capture**
Joerg R. Jinschek (Technical University of Denmark)

12:00 p.m. Lunch

1:00 p.m. **KEYNOTE: MOF-based thin film mixed matrix membranes for carbon capture**
Sui Zhang (National University of Singapore)

1:30 p.m. **Ultrafast Molecular Sieving via Two-Dimensional Fullerene Membrane**
Xiaofang Chen (East China Normal University)

1:50 p.m. **Non-thermal ultraviolet detemplation of DD3R zeolite membranes for high-selective CO₂ separation**
Yingpeng Ren (Nanjing Tech University)

2:10 p.m. **Engineering MXene-Modified Ceramic Nanofiltration Membranes for Divalent Ion Removal from Seawater**
Yehia Manawi (Hamad Bin Khalifa University)

2:30 p.m. Coffee break

Session 3: Preparation and application of MOF and other membranes II

3:10 p.m. **KEYNOTE: Glassy MOF composite membranes for robust separation**
Jingwei Hou (The University of Queensland)

3:40 p.m. **Efficient and green synthesis of graphdiynes for membrane separation applications**
Hongwei Fan (Beijing University of Chemical Technology)

4:00 p.m. **Ultrathin Two-Dimensional Covalent Organic Framework Nanosheet Membranes For Gas Separation**
Yunpan Ying (Beijing University of Chemical Technology)

4:20 p.m. **A Sustainability Window – Strategies to Unlock Free-Standing ZIF-62-Glass Membranes for CO₂ Capture**
Alexander Knebel (Friedrich-Schiller-Universität Jena)

4:40 p.m. **Highly Crystalline and Oriented 2D Covalent Organic Framework Membranes for Molecular and Ionic Separations**
Zhiping Lai (King Abdullah University of Science and Technology)

5:00 p.m. **Tackling Challenges in Propylene/Propane Separation**
R. ShivaGanesh (Indian Institute of Technology)

5:20 p.m. End of Day 2

Thursday, June 25, 2026

08:20 a.m. Daily announcements

Session 5: Zeolite membrane separation and membrane reactors

8:30 a.m.	INVITED TALK: Zeolite Membrane Reactors for Process Intensification Jürgen Caro (Leibniz Universität Hannover)
9:10 a.m.	KEYNOTE: Estimation of CO₂/CH₄ gas permeation characteristics of DDR-type zeolite membrane Hiroshi Madokoro (NGK Corporation)
9:40 a.m.	Coffee break
10:10 a.m.	Microstructural Regulation of CHA-Type Zeolite Membranes for Molecular Sieving Bo Liu (Nanjing Tech University)
10:30 a.m.	Production and Process Evaluation of SSZ-13 Zeolite Membranes for CO₂ and H₂ Separation Alireza Taherizadeh (Fraunhofer IKTS)
10:50 a.m.	Process Intensification of CO₂ Hydrogenation via Dual-Functional Zeolite-Based Membrane Reactors Yayu Wei (Ningbo University)
11:10 a.m.	Dehydrogenation of a Liquid Organic Hydrogen Carrier Using a Zeolite Membrane Under Low-Temperature Conditions Seungmi Lee (Korea University)
11:30 a.m.	Effects of feed composition and support properties on the dehydration performance of LTA zeolite membranes in H₂O/IPA/ECH ternary mixtures Dain Ha (Korea University)
11:50 a.m.	Lunch
12:50 p.m.	Transfer to Fraunhofer IKTS, Hermsdorf
1:30 p.m.	Lab tour at Fraunhofer IKTS / Coffee break
2.50 p.m.	Transfer to Leuchtenburg Castle
4:00 p.m.	Guided Tour of Leuchtenburg Castle and Ceramics Museum
6:00 p.m.	Conference Dinner Medieval Style
9:00 p.m.	Transfer back to Jena
9:30 p.m.	End of Day 3

Friday, June 26, 2026

08:20 a.m. Daily announcements

Session 6: Industrial applications

8:30 a.m. **INVITED TALK: Hollow Fiber Supported Zeolite Membranes: Opportunities, Challenges and Industrialization**
Xuehong Gu (Nanjing Tech University)

9:10 a.m. **KEYNOTE: Potential industrial gas separations using zeolite membranes**
Jonas Hedlund (Luleå University of Technology)

9:40 a.m. Coffee break

10:10 a.m. **Advancements in Zeolite Membrane Technology for Bioethanol Dehydration: Achieving Over 30% Reduction in Production Costs**
Yanshuo Li (Ningbo University)

10:30 a.m. **Regeneration of TEG by pervaporation dehydration for hydrogen drying at the Bad Lauchstädt Energy Park**
Thomas Gallert (DBI - Gastechnologisches Institut gGmbH Freiberg)

10:50 a.m. **Ultra-thin CHA membranes for natural gas upgrading**
Liang Yu (Luleå University of Technology)

11:10 a.m. **Integrated ceramic-polymer membrane treatment of gas-field produced water**
Viktor Kochkodan (Hamad Bin Khalifa University)

11:30 a.m. **MOF UiO-66 membranes for hydrocarbon separation**
Xinlei Liu (Tianjin University)

11:50 a.m. Lunch

Session 7: Modeling and upscaling

12:40 p.m. **INVITED TALK: Multiscale modelling of gas adsorption and separation in metal-organic framework/polymer membranes**
Rocio Semino (Sorbonne Université)

1:20 p.m. **KEYNOTE: Accelerating Design of MOF and COF Membranes by Bridging Molecular Simulations and Machine Learning**
Seda Keskin (Koç University)

1:50 p.m. **Probing complex interfaces in metal-organic frameworks via adaptive multiscale simulations**
Hari Haran Sudhakar (Sorbonne Université)

2:10 p.m.	Fundamental understanding of gas mass transport in zeolites: the role of outer surface resistance Saman Salehian (Luleå University of Technology)
2:30 p.m.	Fabrication of meter-scale perforated graphene oxide nanofiltration membranes Kemal Celebi (Zhejiang University)
2:50 p.m.	Study of water adsorption within zeolite pores and its influence on gas separation performance Mehdi Tarkhani (Luleå University of Technology)
3:10 p.m.	Embryonic Zeolite-Mediated Suture Synthesis of Thin and Scalable Zeolite Membranes for Tailored Gas Separation Xuerui Wang (Nanjing Tech University)
3:30 p.m.	Closing ceremony
3:50 p.m.	End of conference

Poster Session

1	Light-Controlled Reaction Kinetics and Stacking in a Porphyrin-Based COF Membranes Synthesized at the Air–Water Interface Maximilian Hupfer (Leibniz-Institute of Photonic Technology)
2	Development of commercial-grade zeolite membrane fabrication technology for industrial applications Lee Sungyoun (EMST Co. R&D Institute)
3	A Method for Fabricating High-Quality Chabazite Zeolite Membranes Without the Use of Organic Structure-Directing Agents Seungmi Lee (Korea University)
4	Impact of water contact and seed layer deposition on the dehydration performance of LTA zeolite membranes Dain Ha (Korea University)
5	Serendipitous discovery of self-immolating COFs in an attempt to synthesize amine-functionalized COFs Subham Ojha (Martin-Luther-Universität Halle-Wittenberg)
6	Evidence of Heteroepitaxy and Solid Solutions in lattice matched ternary COF Systems Juliane Lange (Martin-Luther-Universität Halle-Wittenberg)
7	KFI zeolite membrane on tubular Al₂O₃ for separation of ethanol/water mixtures via pervaporation Johannes Lehmann (TU Dresden)
8	Efficient separation of SO₂/NO₂ on in-situ synthesized NaA zeolite membrane Ziyi Li (University of Science and Technology Beijing)
9	Stimuli-Responsive Lattice Dynamics in Azobenzene-Loaded UiO-66-NH₂ Svetlana Miliutina (Friedrich-Schiller-Universität Jena)
10	Ultrathin Phase Inversion Mixed Matrix Membranes from Polysulfone and MIL-125(Ti)-NH₂ for CO₂ Capture Sevda Alinezhad (Friedrich-Schiller-Universität Jena)
11	Liquid-based activation of MFI and CHA zeolite nanosheets for aggregation-free membrane fabrication Kemal Celebi (Zhejiang University)
12	Hierarchical surface smoothening of metal meshes enabling high-flux ZIF-8 membranes for robust gas separation Fabian Yuki Scheffler (École Polytechnique Fédérale de Lausanne)
13	Molecular Sieving vs. Adsorption-Diffusion: Helium Separation in Carbon and Zeolite Membranes Adrian Simon (Fraunhofer IKTS)

14 **Carbon-containing membranes for hydrogen separation**
Ralf Wyrwa (Fraunhofer IKTS)
